

Clearing curves, real trials (x = empty cycle)

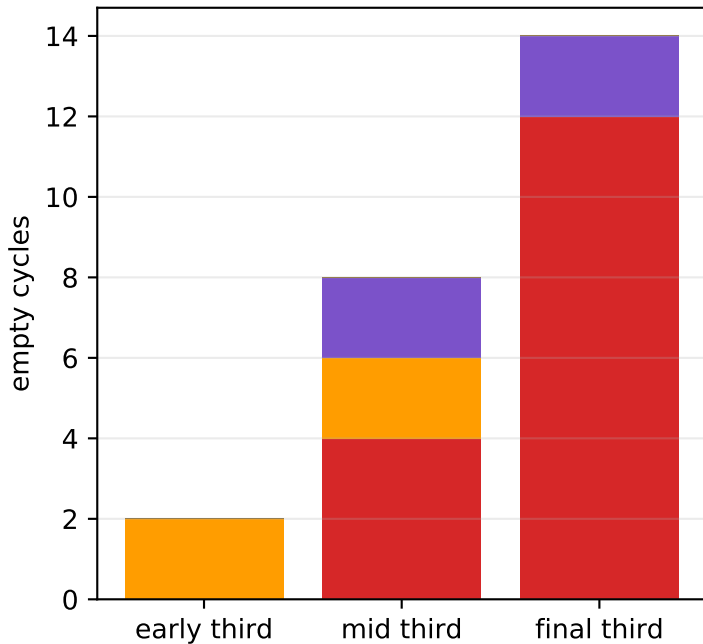

Per-cycle outcomes (bar = logs grasped; below axis = empty cycle by class)

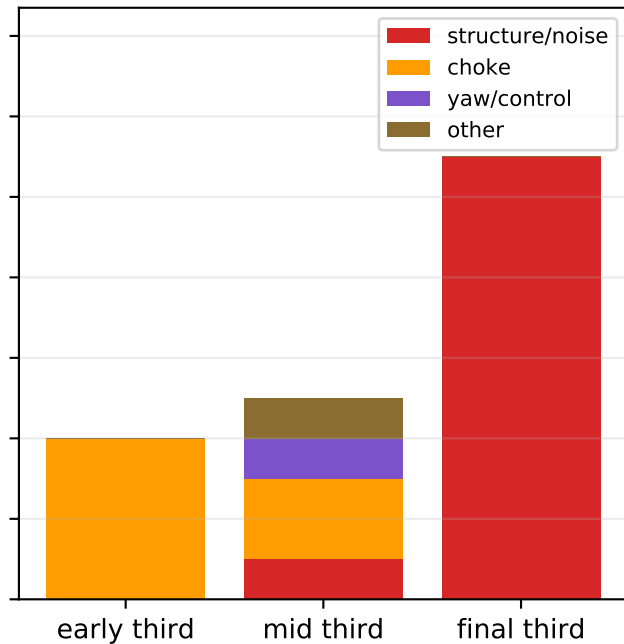

Empty-cycle causes by trial progress

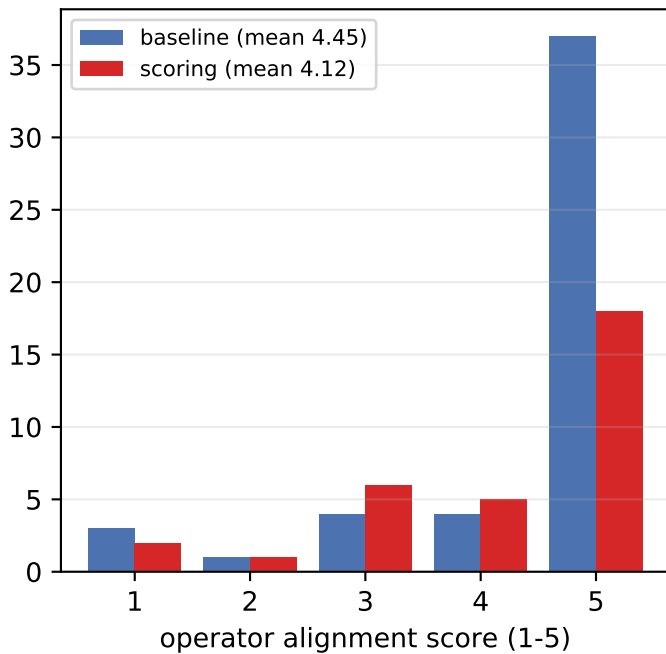

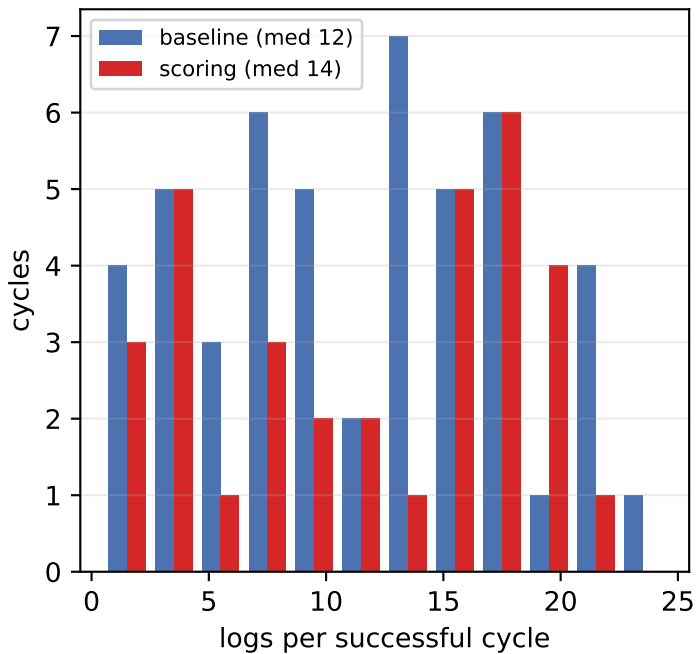

Baseline (3 trials, 73 cycles)

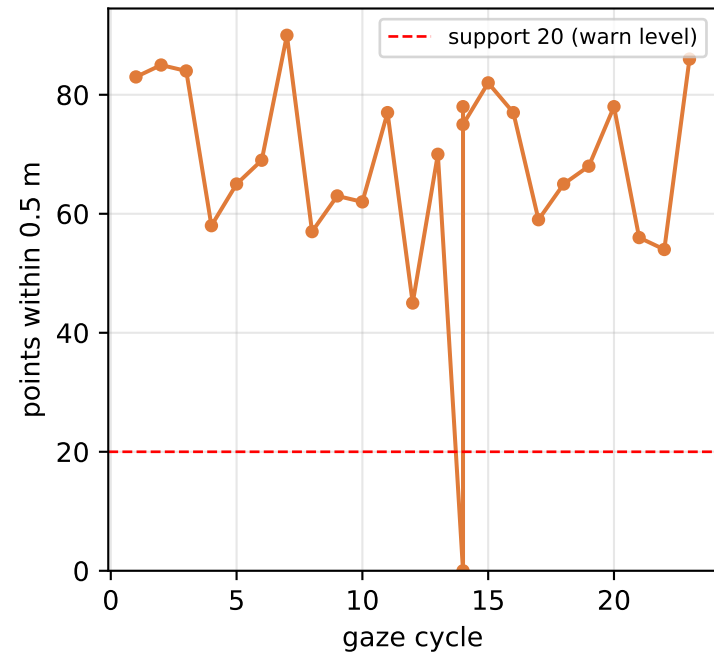

Scoring (2 trials, 53 cycles)

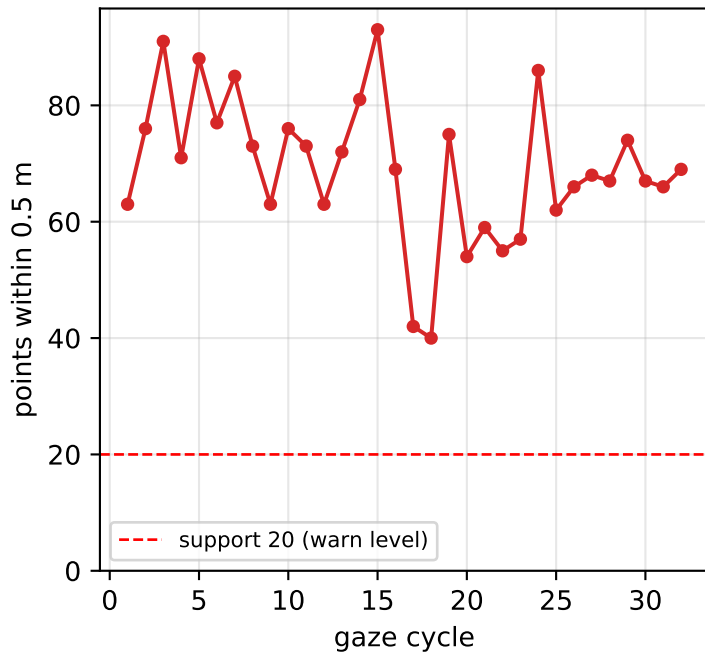

Grasp quality distributions

Scoring single: target support per gaze

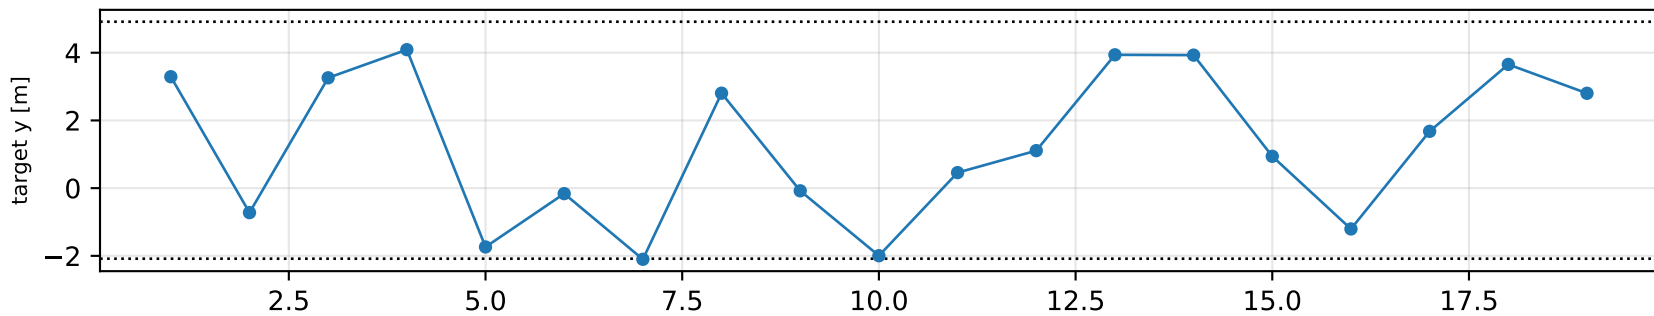

Scoring double: target support per gaze

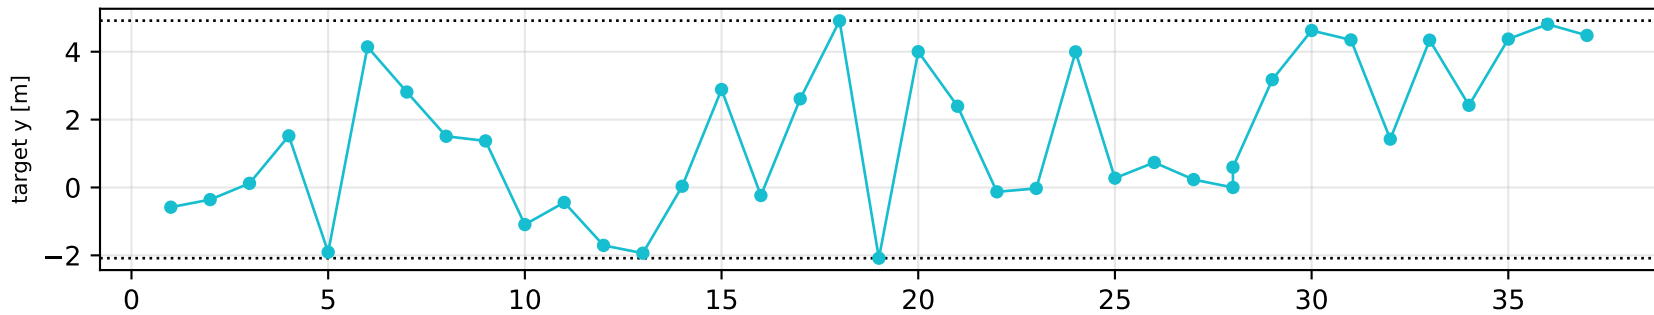

Commanded target y over each trial

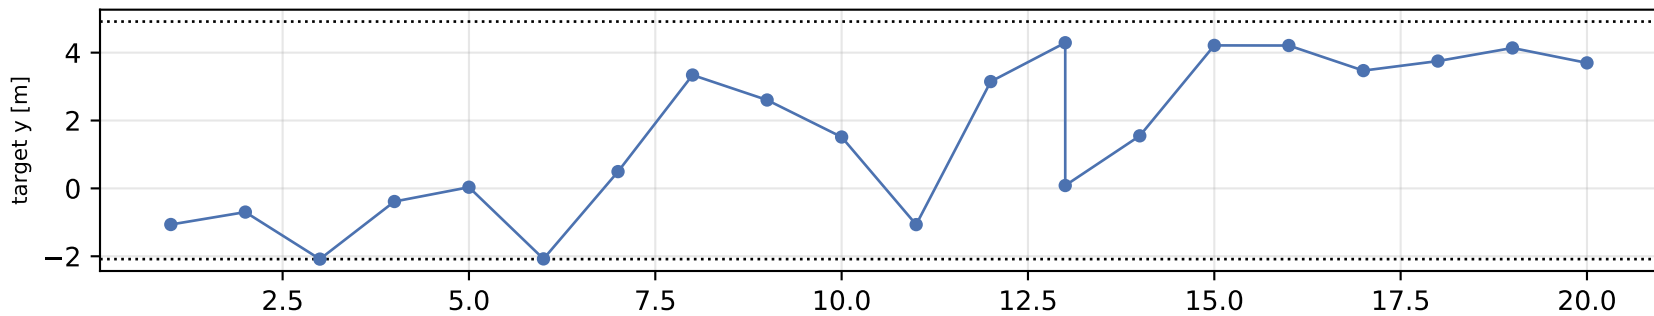

Baseline double (rack_y_shift -0.40; dotted = action box y bounds)

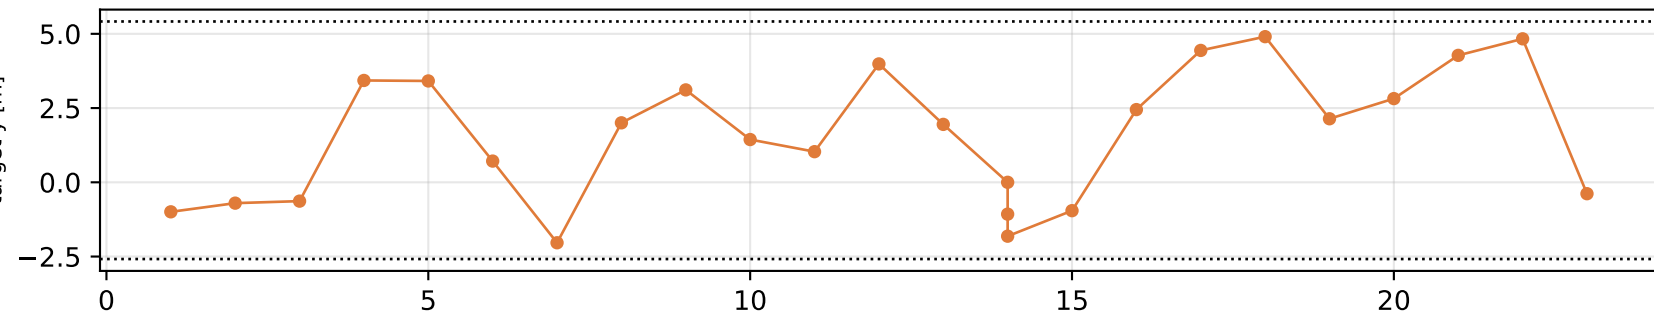

Baseline jagged (rack_y_shift -0.40; dotted = action box y bounds)

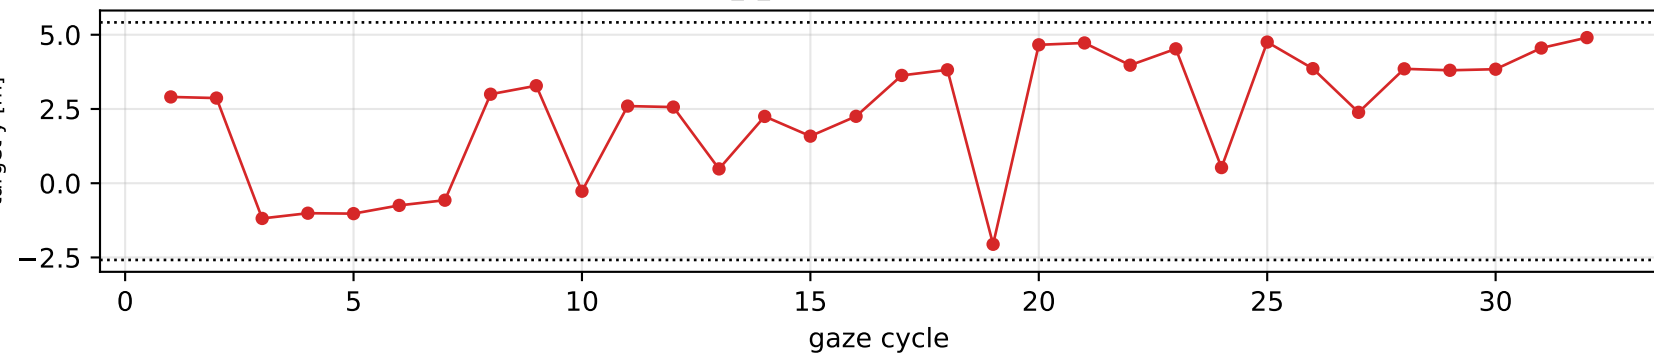

Baseline single (rack_y_shift -0.40; dotted = action box y bounds)

Scoring single (rack_y_shift -0.40; dotted = action box y bounds)

Scoring double (rack_y_shift -0.40; dotted = action box y bounds)

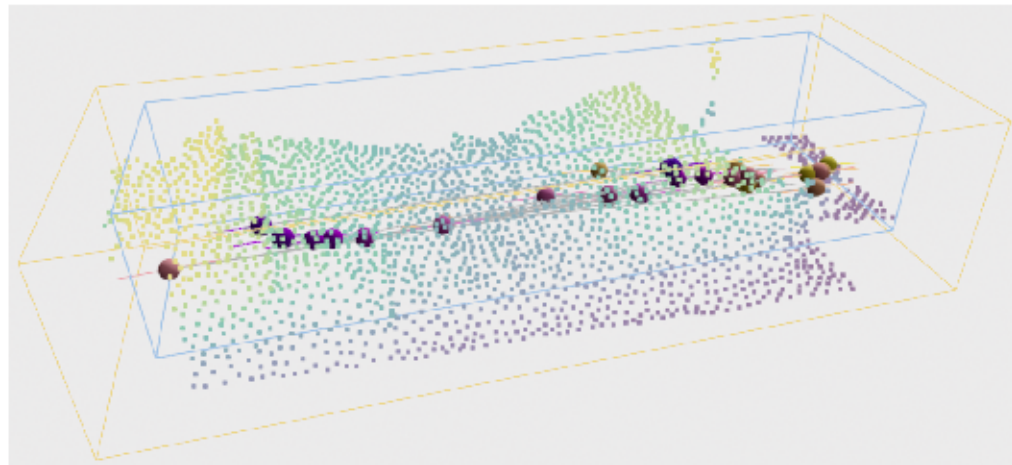

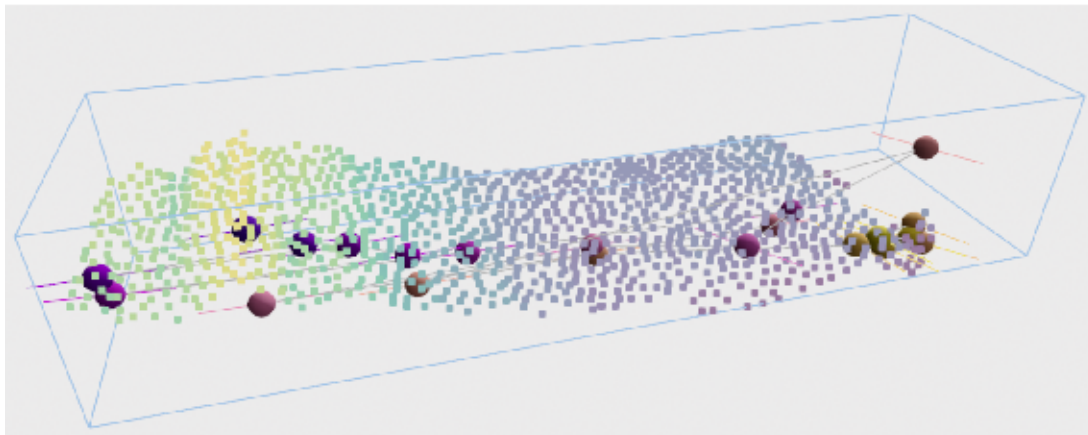

Commanded targets over the recorded clouds (Open3D)

Real-time image: 21 seconds image
frequency: 1000 points/s, 10000 points/s, 100000 points/s

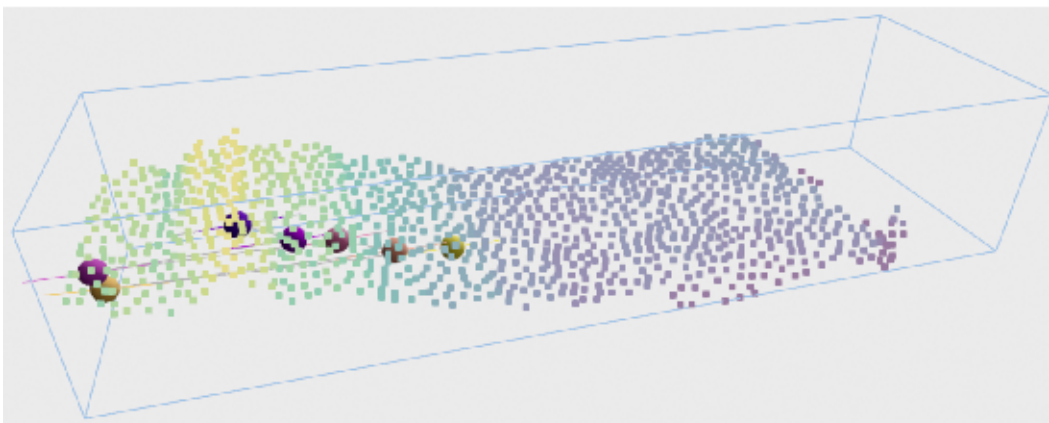

Real-time image: 21 seconds image
frequency: 1000 points/s, 10000 points/s, 100000 points/s

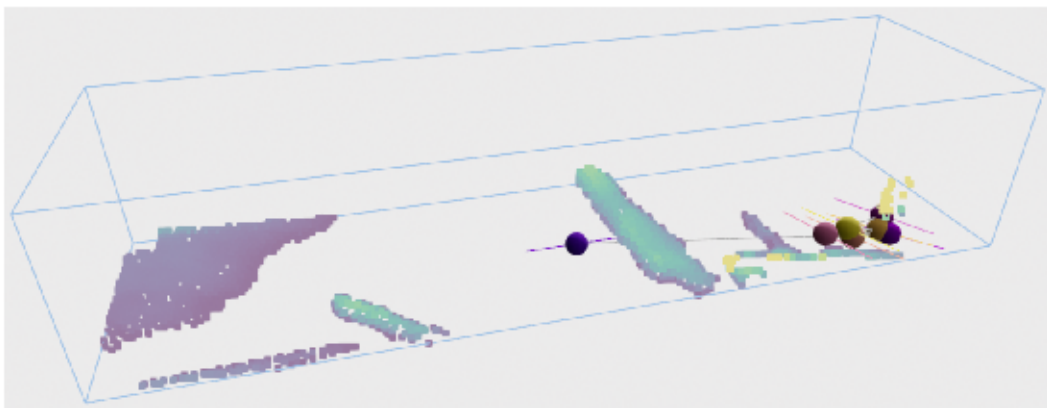

First third vs final third: targets migrate to the rack end

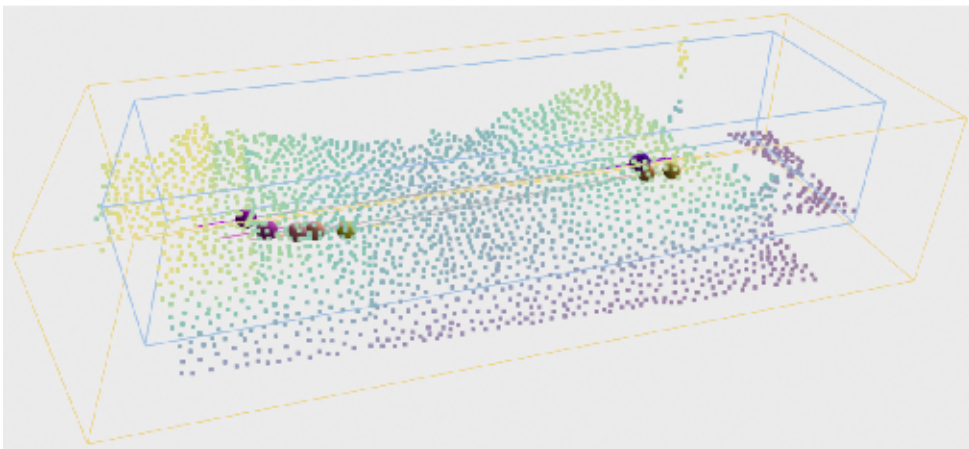

Scoring rack near final third targets
cycle 10

Scoring rack near final third targets
cycle 10

Scoring rack near final third targets
cycle 10

Scoring rack near final third targets
cycle 10
